*Machine Learning for Data Streams* Albert Bifet 2018-03-16 A hands-on approach to tasks and techniques in data stream mining and real-time analytics, with examples in MOA, a popular freely available open-source software framework. Today many information sources—including sensor networks, financial markets, social networks, and healthcare monitoring—are so-called data streams, arriving sequentially and at high speed. Analysis must take place in real time, with partial data and without the capacity to store the entire data set. This book presents algorithms and techniques used in data

stream mining and real-time analytics. Taking a hands-on approach, the book demonstrates the techniques using MOA (Massive Online Analysis), a popular, freely available open-source software framework, allowing readers to try out the techniques after reading the explanations. The book first offers a brief introduction to the topic, covering big data mining, basic methodologies for mining data streams, and a simple example of MOA. More detailed discussions follow, with chapters on sketching techniques, change, classification, ensemble methods, regression, clustering, and frequent pattern mining. Most of these chapters include exercises, an MOA-based lab session, or both. Finally, the book discusses the MOA software, covering the MOA graphical user interface, the command line, use of its API, and the development of new methods within MOA. The book will be an essential reference for readers who want to use data stream mining as a tool, researchers in innovation or data stream mining, and programmers who want to create new algorithms for MOA.

**Auto Repair For Dummies** Deanna Sclar 2019-01-07 Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. **Sentimental Economy** Edoardo Nesi 2022-08-09 In a warm, perceptive essay that touches on economics, fashion, literature, and politics, the Strega Prize-winning author of *Story of My People* reflects on the seismic shifts of 2020 and the diverse ways we're adapting. Attempting to make sense of the

incredible upheaval of 2020—from the devastating impact of COVID-19 to the sudden loss of his father—Edoardo Nesi considers the changing global economy and its effect on our lives. He shares the stories of Alberto Magelli, a small textile entrepreneur; Livia Firth, a prominent advocate for sustainability; Elisa Martelli, a young Sangiovese winemaker; Enrico Giovannini, a leading economist and statistician; Rino Pratesi, a proud butcher from the heart of Tuscany; and more. From the overworked to the unemployed, we're all grappling with difficult questions about our current disorienting world: Will we ever feel healthy again, and what will it take to regain "normality?" What does progress mean today? Have science and technology let us down? What will the increased prevalence of remote working mean for our cities, and for our lifestyles generally? Deftly weaving together the personal and the economic, Nesi takes us on a fascinating journey to understanding.
