Lost Flint Gary Flinn 2021-05-10 The city of Flint waxed and waned with the automotive industry of the twentieth century. Where they have not vanished completely, crumbling signs of past opulence stand as painful

reminders of more recent struggles. Hardly a trace remains of the Buick City factory complex that sprawled across the city's north side. The placid waters of Flint Park Lake once echoed with the sounds of an amusement park-- games, dancing, circus acts and even a roller coaster. Flint Community Schools pioneered a model for how schools can function outside regular hours, but too many now are closed and deteriorating. Local author Gary Flinn uncovers the abandoned places and lost traditions from the Vehicle City's past.

2016-06-15 The 1970-1974 Plymouth Barracudas and Dodge Challengers are compact, lightweight, and extremely powerful

pony cars; some are considered to be the greatest Mopar muscle cars of the era. The platform, known as the E-Body for this generation, was Chrysler's response to the competition from the Ford Mustang and Chevy Camaro. Today, the E-Body Barracudas and Challengers are some of the most valuable and popular muscle cars ever built. In *The Definitive Plymouth Barracuda and Dodge Challenger Guide: 1970-1974*, seasoned journalist Scott Ross has unearthed new information from the key personnel involved in designing, engineering, and building these brash muscle cars. Ross provides comprehensive engine, transmission, and interior options as well as essential trim package and color code information. You learn the bottom line on original equipment packages and options. Ross covers Special Edition, R/T, Gran Coupe, and Rapid Transit System packages. And of course, the preeminent

models in the lineup, Hemi Cuda, Challenger 440 six pack, AAR Cuda, and Challenger TA are covered in extensive detail. The large option list (and which options were available on which cars) is covered in great detail, which will greatly assist you with authentication. Plymouth Barracudas and Dodge Challengers are some of the most powerful and valuable Mopar muscle cars ever built. If you have been searching for the comprehensive story and vital option information for these classic Mopar muscle cars, you don't need to look any further.

Firebird Trans Am David Newhardt David Newhardt. The Pontiac Firebird was originally overshadowed by the popular Chevrolet Camaro, but the Firebird developed a loyal following and a reputation for true high-performance to earn a high-profile spot in muscle car history. It also had a role in pop culture as Burt Reynolds drove a Trans Am in Smokey and the Bandit and young David Hasselhoff took direction from his talking Trans Am in Knight Rider. While 1970s environmental and insurance interests emasculated most muscle cars, the Trans Am made a defiant last stand. In 1973, Pontiac introduced the mighty Trans Am Super Duty 455, one of the fastest muscle cars ever. The high-performance, high-profile history of the Firebird Trans Am is presented here along

Hybrid Factories in the United States Tetsuji Kawamura 2011-07-07 This book assesses the transferability of Japanese-style management and production systems to 81 factories in North America owned by Japanese companies. All of the book's investigations are based on an original methodology, "hybridization analysis", which quantifies the degree to which features of the Japanese system have been transplanted, using an elaborate checklist and scoring system. With its wealth of data, it should serve as a handy reference volume to anyone interested in the issue of international

management and the impact of globalization upon production models.

Pontiac Firebird David Newhardt 2017-01-03 Celebrate 50 years of Pontiac's iconic muscle car. The early 1960s saw American auto manufacturers desperately trying to sell cars to the emerging baby-boom market. Pontiac attained success with its original muscle car, the GTO, but as successful as the GTO was, it was handily outsold by Ford's grand-slam home-run pony car, the Mustang. In response, Pontiac entered the pony car market in 1967, its new Firebird, a model that became one of the most iconic cars of the classic muscle-car era. Eventually the top Firebird model, the Trans Am, became the standard bearer for automotive performance in the U.S. market, kept the muscle car flame alive throughout the dark years of the 1970s and led the charge when performance reemerged in the 1980s. Pontiac

Firebird: 50 Years chronicles the Firebird's rich history, from the early attempts to reach the youth market in the early 1960s, through the potent and turbulent years of the classic muscle car era, the resurgence of muscle in the 1980s, to the car's continued popularity today.

Nancy Love and the WASP Ferry Pilots of World

War II Sarah Byrn Rickman 2008 She flew the swift P-51 and the capricious P-38, but the heavy, four-engine B-17 bomber and C-54 transport were her forte. This is the story of Nancy Harkness Love who, early in World War II, recruited and led the first group of twenty-eight women to

fly military aircraft for the U.S. Army. When the United States entered World War II, the Army needed pilots to transport or "ferry" its combat-bound aircraft across the United States for overseas deployment and its trainer airplanes to flight training bases. Most male pilots were assigned to combat preparation, leaving few available for ferrying jobs. Into this vacuum stepped Nancy Love and her civilian Women's Auxiliary Ferrying Squadron (WAFS). Love had advocated using women as ferry pilots as early as 1940. Jackie Cochran envisioned a more ambitious plan, to train women to perform a variety of the military's flight-related jobs stateside. The Army implemented both programs in the fall of 1942, but Jackie's idea piqued General Hap Arnold's interest and, by summer 1943, her concept had won. The women's programs became one under the name Women

Airforce Service Pilots (WASP), with Cochran as the Director of Women Pilots and Love as the Executive for WASP. Nancy Love believed that the women attached to the military needed to be on equal footing with the men and given the same opportunities to prove their abilities and mettle. Young women serving today as combat pilots owe much to Love for creating the opportunity for women to serve. Her foresight and tenacity nearly seventy years ago helped ensure their future. Now author Sarah Byrn Rickman, aviation historian, presents the first full-length biography of Nancy Love and her role in the WAFS and WASP programs, Her book will appeal to all with a love of flight.
