This Is Ear Hustle Nigel Poor 2021-10-19 An illuminating view of prison life, as told by currently and formerly incarcerated people, from the co-creators and co-hosts of the Peabody- and Pulitzer-nominated podcast Ear Hustle "A must-read for fans of the legendary podcast and all those who seek to understand crime, punishment, and mass incarceration in America."—Piper Kerman, author of *Orange Is the New Black* When Nigel Poor and Earlonne Woods met, Nigel was a photography professor volunteering with the Prison University Project and Earlonne was serving thirty-one years to life at California's San Quentin State Prison. Initially drawn to each other by their shared interest in storytelling, neither had podcast production experience when they decided to enter Radiotopia's contest for new shows . . . and won. Using the prize for seed money, Nigel and Earlonne launched Ear Hustle, named after the prison term for "eavesdropping." It was the first podcast created and produced entirely within prison and would go on to be heard millions of times worldwide, garner Peabody and Pulitzer award nominations, and help earn Earlonne his freedom when his sentence was commuted in 2018. In *This Is Ear Hustle*, Nigel and Earlonne share their own stories of how they came to San Quentin, how they created their phenomenally popular podcast amid extreme limitations, and what has kept them collaborating season after season. They present new stories, all with the same insight, balance, and rapport that distinguish the podcast. In an era when more than two million people are incarcerated across the United States—a number that grows by 600,000 annually—Nigel and Earlonne explore the full and often surprising realities of prison life. With characteristic candor and humor, their moving portrayals include unexpected moments of self-discovery, unlikely alliances, inspirational resilience, and ingenious work-arounds. One personal narrative at a time, framed by Nigel's and Earlonne's distinct perspectives, *This Is Ear Hustle* reveals the complexity of life for incarcerated and formerly incarcerated people while illuminating the shared experiences of humanity that unite us all.

Public Opinion Walter Lippmann 1922 In what is widely considered the most influential book ever written by Walter Lippmann, the late journalist and social critic provides a fundamental treatise on the nature of human information and communication. The work is divided into eight parts, covering such varied issues as stereotypes, image making, and organized intelligence. The study begins with an analysis of "the world outside and the pictures in our heads", a leitmotif that starts with issues of censorship and privacy, speed, words, and clarity, and ends with a careful survey of the modern newspaper. Lippmann's conclusions are as meaningful in a world of television and computers as in the earlier period when newspapers were dominant. Public Opinion is of enduring significance for communications scholars, historians, sociologists, and political scientists. Copyright © Libri GmbH. All rights reserved.

Action Research in Education, Second Edition Sara Efrat

Efron 2019-11-18 Acclaimed as a text and professional development tool, this user-friendly resource has now been revised and updated, and offers expanded coverage of collaborative action research (CAR) and participatory action research (PAR). Preservice and inservice educators get crucial step-by-step guidance for conducting classroom- and school-based studies to improve their instructional practices. Organized to mirror the full cycle of action research, the book provides balanced coverage of qualitative, quantitative, and mixed methods approaches. Vivid vignettes and examples illustrate research approaches for a range of teaching and learning situations, school subjects, and age groups (PreK–12). Readers learn how research approaches are driven by the research question, as well as how to develop data collection strategies; design and/or evaluate assessment tools; interpret, analyze, report, and implement study results; and design a new cycle of research that builds on the previous one. New to This Edition *In-depth descriptions of CAR and PAR-- which enable groups of teachers to work together to solve problems in a classroom or school--plus examples of both throughout the book. *Expanded or new discussions (with examples) of such topics as how research approaches and methods are driven by the research question, how to assess different types of reliability and validity, the differences between analysis and interpretation, and how to use sequential cycles of research for continuous improvement and professional development. *Fully updated references and resources. Pedagogical Features *Both individual and group exercises and activities in every chapter. *New and updated checklists and guidelines that enable busy educators to self-assess the progress and quality of their studies. *Sample templates to assist in development of research instruments. *Example boxes illustrating the components of an action research report. *Summary tables highlighting key aspects of

different research strategies. *Chapter summaries (now shorter for ease of use) and suggestions for further reading.

Integrating Technology in Higher Education M. O. Thirunarayanan 2005 Integrating Technology in Higher Education contains 20 chapters that provide technology integration experiences of authors from four continents and a diversity of disciplines in higher education settings. The utilization of various hardware and software tools to facilitate teaching and learning is discussed in the chapters of this edited book. The four major themes that crisscross the chapters of the book are: infrastructure, instructional design, integration, and interaction. Chapter authors share their real-life technology integration experiences and offer tried and tested suggestions and recommendation to others who wish to integrate technologies into their own educational settings.

Corrosion in Reinforced Concrete Structures H Böhni 2005-01-20 Reinforced concrete has the potential to be very durable and capable of withstanding a variety of adverse environmental conditions. However, failures in the structures do still occur as a result of premature reinforcement corrosion. In this authoritative book the fundamental aspects of this complex process are analysed; focusing on corrosion of the reinforcing steel, and looking particularly, at new scientific and technological developments. Monitoring techniques, including the newly developed online-monitoring, are examined, as well as the numerical methods used to simulate corrosion and perform parameter studies. The influence of composition and microstructure of concrete on corrosion behaviour is explored. The second half of the book, which deals with corrosion prevention methods, starts with a discussion on stainless steels as reinforcement materials. There are comprehensive reviews of the use of surface treatments and coatings, of the application of corrosion inhibitors and of the application of electrochemical techniques. In each case the necessary scientific fundamentals are explained and practical instances of use are looked at. This is an invaluable guide for engineers, materials scientists and researchers in the field of structural concrete. Fundamental aspects of corrosion in concrete are analysed in detail Explores how to minimise the effects of corrosion in concrete Invaluable guide for engineers, materials scientists and researchers in the field of structural concrete

The Education of a Graphic Designer Steven Heller 2015-10-20 Revised and updated, this compelling collection of essays, interviews, and course syllabi is the ideal tool to help teachers and students keep up in the rapidly changing field of graphic design. Top designers and educators talk theory, offer proposals, discuss a wide range of educational concerns—such as theory versus practice, art versus commerce, and classicism versus postmodernism—and consider topics such as emerging markets, shifts in conventions, global impact, and social innovation. Building on the foundation of the original book, the new essays address how graphic design has changed into an information-

presenting, data-visualization, and storytelling field rooted in art and technology. The forward-thinking course syllabi are designed for the increasingly specialized needs of undergraduate and graduate students. Personal anecdotes from these designers about their own educations, their mentors, and their students make this an entertaining and illuminating idea book. The book features writing from: Lama Ajeenah, Roy R. Behrens, Andrew Blauvelt, Max Bruinsma, Chuck Byrne, Moira Cullen, Paula J. Curran, Louis Danziger, Liz Danzico, Meredith Davis, Sheila de Bretteville, Carla Diana, Johanna Drucker, Milton Glaser, Rob Giampietro, April Greiman, Sagi Haviv, Lorraine Justice, Jeffery Keedy, Julie Lasky, Warren Lehrer, Ellen Lupton, Victor Margolin, Andrea Marks, Katherine McCoy, Ellen McMahan, J. Education for Inclusion and Diversity Adrian Ashman 2014-08-01 For special education courses in schools of early childhood, primary and secondary education. Education for Inclusion and Diversity 5e continues to build on the concept of inclusive curriculum and the diversity of learning needs. This Australian text gives students a broad understanding of the principles of inclusive education, and the ways in which teachers can accommodate the differing learning needs of their students. It has been written by experts in the field of inclusion and special needs education with the particular aim of teaching students how to apply the ideas that have been presented in each chapter.

Digital Literacies for Learning Allan Martin 2006 In the 21st century, digital tools enable information to be generated faster and in greater profusion than ever before, to the point where its extent and value are literally beyond imagining. Such quantities can only be meaningfully addressed using more digital tools, and thus our relationship to information is fundamentally changed. This situation presents a particular challenge to processes of learning and teaching, and demands a response from both information professionals and educators. Enabling education in a digital environment means not only changing the form in which learning opportunities are offered, but also enabling students to survive and prosper in digitally based learning environments. This collection brings together a global community of educators, educational researchers, librarians and IT strategists, to consider how learners need to be equipped in an educational environment that is increasingly suffused with digital technology. Traditional notions of literacy need to be challenged, and new literacies, including information literacy and IT literacy, need to be considered as foundation elements for digitally involved learners. Leading international experts from the USA, Canada, Australia, New Zealand, South Africa, Mexico and throughout Europe contribute to the debate, and Hannelore Rader, Librarian and Dean of the University Libraries, University of Louisville, Kentucky, provides the foreword. The book is

in two parts: In Part 1, Literacies in the Digital Age, the contributors analyse how digital technologies have enabled transformative change in the ways in which learning can be constructed, and discuss the nature of the new literacies that have emerged in this new virtual and e-learning environment. In Part 2, Enabling and Supporting Digital Literacies, the contributors go on to consider the ways in which digital literacies can be made available to learners, and how these literacies are being relocated in a more student-centred environment within the broader perspective of learning. Readership: This book takes the issues raised in the successful Information and IT Literacy, also co-edited by Allan Martin, into a broader context. It is essential reading for all information professionals and educators involved in developing strategies and practices for learning in a digital age.

The Hidden Brain Shankar Vedantam 2010-01-19 The hidden brain is the voice in our ear when we make the most important decisions in our lives—but we're never aware of it. The hidden brain decides whom we fall in love with and whom we hate. It tells us to vote for the white candidate and convict the dark-skinned defendant, to hire the thin woman but pay her less than the man doing the same job. It can direct us to safety when disaster strikes and move us to extraordinary acts of altruism. But it can also be manipulated to turn an ordinary person into a suicide terrorist or a group of bystanders into a mob. In a series of compulsively readable narratives, Shankar Vedantam journeys through the latest discoveries in neuroscience, psychology, and behavioral science to uncover the darkest corner of our minds and its decisive impact on the choices we make as individuals and as a society. Filled with fascinating characters, dramatic storytelling, and cutting-edge science, this is an engrossing exploration of the secrets our brains keep from us—and how they are revealed.

Capitalism at the Crossroads Stuart L. Hart 2010-06-15 Today's era of economic crisis has sent a powerful message: The age of "mercenary" capitalism is ending. We must finally embark on a new age of sustainable, stakeholder-based capitalism. While enlightened executives and policymakers understand the critical need for change, few have tangible plans for making it happen. In *Capitalism at the Crossroads: Next Generation Business Strategies for a Post-Crisis World*, Third Edition, Stuart L. Hart presents new strategies for identifying sustainable products, technologies, and business models that will drive urgently needed growth and help solve social and environmental problems at the same time. Drawing on his experience consulting with top companies and NGOs worldwide, Hart shows how to craft your optimal sustainability strategy and overcome the limitations of traditional "greening" approaches. In this edition, he presents new and updated case studies from the United States and around the world, demonstrating what's working and what isn't. He also guides business leaders in building an organizational "infrastructure for sustainability"—one that can survive budgeting and boardrooms, recharging innovation and growth throughout your enterprise. Discover: · The new business case for pursuing sustainable capitalism ·

Sustainability strategies that go far beyond environmental sensitivity · How to fully embed your enterprise in the local context--and why you should · Tactics for making long-term sustainability work in a short-term world

The Piazza Tales Herman Melville 1856 This collection of short stories is the only such book published in Melville's lifetime. "Bartley the Scrivener," the collection's most famous story, concerns a clerk who works as a copyist for a well-to-do Manhattan lawyer. Bartleby steadfastly refuses to perform any of the tasks required by his job and his reply, "I would prefer not to," comes to haunt his employer. Today "Bartleby" is considered one of the most significant American short stories and a precursor to the absurdist fiction of Franz Kafka. Also notable is the novella "Benito Cereno." The story concerns a slave rebellion on board a Spanish slave-trading ship in 1799 and is noted for its foreboding atmosphere and dark, complex plot. Another novella in the collection, "The Encantadas," offers a philosophical look at the Galápagos Islands.

Microaggression Theory Gina C. Torino 2018-10-02 Get to know the sociopolitical context behind microaggressions Microaggressions are brief, everyday exchanges that send denigrating messages to certain individuals because of their group membership (e.g., race, gender, culture, religion, social class, sexual orientation, etc.). These daily, common manifestations of aggression leave many people feeling vulnerable, targeted, angry, and afraid. How has this become such a pervasive part of our social and political rhetoric, and what is the psychology behind it? In *Microaggression Theory*, the original research team that created the microaggressions taxonomy, Gina Torino, David Rivera, Christina Capodilupo, Kevin Nadal, and Derald Wing Sue, address these issues head-on in a fascinating work that explores the newest findings of microaggressions in their sociopolitical context. It delves into how the often invisible nature of this phenomenon prevents perpetrators from realizing and confronting their own complicity in creating psychological dilemmas for marginalized groups, and discusses how prejudice, privilege, safe spaces, and cultural appropriation have become themes in our contentious social and political discourse. Details the psychological effects of microaggressions in separate chapters covering clinical impact, trauma, related stress syndromes, and the effect on perpetrators Examines how microaggressions affect education, employment, health care, and the media Explores how social policies and practices can minimize the occurrence and impact of microaggressions in a range of environments Investigates how microaggressions relate to larger social movements If you come across the topic of microaggressions in your day-to-day life, you can keep the conversation going in a productive manner—with research to back it up!

The Global Findex Database 2017 Asli Demircug-Kunt 2018-04-19 In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, *The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution* includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the

Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at www.worldbank.org/globalfindex.
