Creating Curricula: Aims, Knowledge and Control Dominic Wyse 2018-03-08 Knowledge has been a defining focus for the curriculum studies field. In the early part of the 21st century convincing arguments were mounted that knowledge needed to be 'brought back in', both to the curriculum of schools and to the attention of curriculum researchers. This book is a result of these arguments, and what some regarded as a 'crisis' in curriculum study related to the growing emphasis on international comparisons between education systems. The book's most important contribution is to build on seminal work in the sociology and philosophy of education in order to develop new foundations for curriculum study, using the importance of 'transactions' as the context for understanding knowledge in the curriculum. The contributors build on this importance to suggest a rapprochement in the field around the idea of curriculum knowledge as both constructed and real. This book was originally published as a special issue of *The Curriculum Journal*.

The White Racial Frame Joe R. Feagin 2013-08-21 In this book Joe Feagin extends the systemic racism framework in previous Routledge books by developing an innovative concept, the white racial frame. Now four centuries-old, this white racial frame encompasses not only the stereotyping, bigotry, and racist ideology emphasized in other theories of "race," but also the visual images, array of emotions, sounds of accented language, interlinking interpretations and narratives, and inclinations to discriminate that are still central to the frame's everyday operations. Deeply imbedded in American minds and institutions, this white racial frame has for centuries functioned as a broad worldview, one essential to the routine legitimation, scripting, and maintenance of systemic racism in the United States. Here Feagin examines how and why this white racial frame emerged in North America, how and why it has evolved socially over time, which racial groups are framed within it, how it has operated in the past and in the present for both white Americans and Americans of color, and how the latter have long responded with strategies of resistance that include enduring counter-frames. In this new edition, Feagin has included much new interview material and other data from recent research studies on framing issues related to white, black, Latino, and Asian Americans, and on society generally. The book also includes a new discussion of the impact of the white frame on popular culture, including on movies, video games, and television programs as well as a discussion of the white racial frame's significant impacts on public policymaking, immigration, the environment, health care, and crime and imprisonment issues.

The Tyranny of Language in Education Zubeida Mustafa 2015-03-26 Language is closely linked with a person's socialization. It is something that develops in a community. The culture, political thought, and sociological dimension of people living in a group have a direct relationship with the language bearing on the language they speak. That is why language is never regarded as something neutral, and the medium of instruction used in schools has far-reaching implications. It can facilitate the social, cultural, and intellectual development, or it can hurt the capacity to learn. Unfortunately, factors other than these obvious ones have determined the language to be used to teach a young child in Pakistan. The failure to look at language as a crucial component of education per se has resulted in our failure to spread literacy and learning in the country. Can we reform education in Pakistan using any language? No, says the author, who argues her case from a young child's perspective. Since the first edition of this book, a lot of research has been carried on this subject and should certainly create more awareness among educationists and policymakers, as well as parents. The author proposes the roles to be assigned to the mother tongue, the national language, and English, the international language of the day.

Development, Education and Learning Disability in India Maya Kalyanpur 2021-12-13 This book uses qualitative research methods to examine why students in an Indian context are being identified as having learning disabilities on criteria that are largely drawn from the context of the Global North. It explores the push towards English language instruction as a possible factor that affects poor academic outcomes for students from low-income backgrounds who may be first-generation learners or English language learners. The book

contrasts the different outcomes and supports for academically struggling students across low-income and middle-income backgrounds, with evidence to suggest that, despite the inclusionary principles of Education For All, this label is creating a marginalized group of students.

Developing Readers in the Academic Disciplines Doug Buehl 2017-06-28 Being literate in an academic discipline means more than simply being able to read and comprehend text; it means you can think, speak, and write as a historian, scientist, mathematician, or artist. Doug Buehl strips away the one-size-fits-all approach to content area literacy and presents a much-needed instructional model for disciplinary literacy, showing how to mentor middle and high school learners to become "academic insiders" who are college and career ready. This thoroughly revised second edition of *Developing Readers in the Academic Disciplines* shows how to help students adjust their thinking to comprehend a range of complex texts that fall outside their reading comfort zones. This book --a natural companion to Buehl's *Classroom Strategies for Interactive Learning*, which has been bolstering student comprehension for almost three decades--provides the following supports for teachers: Instructional tools that adapt generic literacy practices to discipline-specific variations Strategies for frontloading instruction to activate and build background knowledge New approaches for encouraging inquiry around disciplinary texts In-depth exploration of the role of argumentation in informational text Numerous examples from science, mathematics, history and social studies, English/language arts, and related arts to show you what vibrant learning looks like in various classroom settings *Developing Readers in the Academic Disciplines* introduces teachers from all disciplines to new kinds of thinking and, ultimately, teaching that helps students achieve new levels of understanding.

Situated Language and Learning James Paul Gee 2012-10-02 Why do poor and minority students under-perform in school? Do computer games help or hinder learning? What can new research in psychology teach our educational policy-makers? In this major new book, Gee tackles the 'big ideas' about language, literacy and learning, putting forward an integrated theory that crosses disciplinary boundaries, and applying it to some of the very real problems that face educationalists today. *Situated Language and Learning* looks at the specialist academic varieties of language that are used in disciplines such as mathematics and the sciences. It argues that the language acquisition process needed to learn these forms of language is not given enough attention by schools, and that this places unfair demands on poor and minority students. The book compares this with learning as a process outside the classroom, applying this idea to computer and video games, and exploring the particular processes of learning which take place as a child interacts with others and technology to learn and play. In doing so, Gee examines what video games can teach us about how to improve learning in schools and engages with current debates on subjects such as 'communities of practice' and 'digital literacies'. Bringing together the latest research from a number of disciplines, *Situated Language and Learning* is a bold and controversial book by a leading figure in the field, and is essential reading for anyone interested in education and language.

Half of a Yellow Sun Chimamanda Ngozi Adichie 2010-10-29 With her award-winning debut novel, *Purple Hibiscus*, Chimamanda Ngozi Adichie was heralded by the Washington Post Book World as the “21st century daughter” of Chinua Achebe. Now, in her masterly, haunting new novel, she recreates a seminal moment in modern African history: Biafra’s impassioned struggle to establish an independent republic in Nigeria during the 1960s. With the effortless grace of a natural storyteller, Adichie weaves together the lives of five characters caught up in the extraordinary tumult of the decade. Fifteen-year-old Ugwu is houseboy to Odenigbo, a university professor who sends him to school, and in whose living room Ugwu hears voices full of revolutionary zeal. Odenigbo’s beautiful mistress, Olanna, a sociology teacher, is running away from her

parents’ world of wealth and excess; Kainene, her urbane twin, is taking over their father’s business; and Kainene’s English lover, Richard, forms a bridge between their two worlds. As we follow these intertwined lives through a military coup, the Biafran secession and the subsequent war, Adichie brilliantly evokes the promise, and intimately, the devastating disappointments that marked this time and place. Epic, ambitious and triumphantly realized, *Half of a Yellow Sun* is a more powerful, dramatic and intensely emotional picture of modern Africa than any we have had before.

Drive Daniel H. Pink 2011-04-05 The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing* Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That’s a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.
