Village Phone Replication Manual David Keogh 2005 Why is it such a challenge to provide telecommunications to rural areas? High initial infrastructure investment, relative low call volumes, high maintenance costs due to harsh environments, cash box collection needs, cash security costs (for coin operated phones), card availability (for prepaid airtime systems), technical illiteracy, remote locations, and high transportation costs are just some of the impediments to providing rural telecommunications access. This manual is based on the experiences of the Village Phone Programmes in Bangladesh and Uganda. In rural villages where no telecommunications services have previously existed, the programme provides cellular phones via a sustainable financing mechanism to poor entrepreneurs who use the phone to operate a business. Such has been the success that over 2,000 village phone businesses are now operating in remote villages of Uganda. This manual is a guideline for replicating the programme in a new country. It establishes a template for creating sustainable initiatives that bring telecommunications to the poor, create viable new businesses for micro-entrepreneurs, and expand the customer base for telecommunications companies.

A Postphenomenological Inquiry of Cell Phones Galit Wellner 2015-11-11 Why does the announcement of a new cellphone model ignite excitement and passion? Why do most people return home when they forget their cellphones, while only few would return for their wallets? How did the cellphone technology become so dominant for many of us? This book offers an analysis of the historical evolution and of the meanings of this

technology in the lives of billions of people. The book offers a unique point of view on the cellphone that merges genealogical analysis of its development since the 1990s and philosophical insights into a coherent analytical framework. With new concepts like “histories of the future” and “memory prosthesis,” the book aims to explain the excitement arising from new model announcements and the ever-growing dependency on the cellphone through the framing of these experiences in wide philosophical contexts. It is the first philosophical analysis of the important roles the cellphone plays in contemporary everydayness.

Sales Daniel Keating 2019-10-30 Emphasizing the institutions and the mechanisms that participants use in the marketplace to conduct transactions, Daniel Keating’s “Systems Approach” provides a functional perspective of Articles 2 and 2A of the Uniform Commercial Code in practice. Comprehensive, problem-based coverage encompasses the domestic sale of goods, real estate sales, leases, and international sales. Thoughtful problems for students incorporate insights from this distinguished author’s interviews with leading figures in commerce as well as from actual sales forms and documents. News stories further illustrate, in real-world examples, how the system works in practice. Organized by Assignments, this engaging casebook lends flexibility in teaching and course design. New to the 7th Edition: The most significant revision ever. This edition has 15 new primary cases as well as 80 new problems at the end of the 28 assignments. The addition of 40 new formative assessment questions and explanations bring the total assessment questions for the book to more than 100. Updates to the Teacher’s Manual, with nearly 350 helpful pages including syllabus suggestions, in-depth answers to each problem, and four complete essay exams and model answers. Three important and recently decided federal appellate cases have been added: VLM Food Trading Int’l, Inc. v. Illinois Trading Co. (7th Cir. 2016) (analyzing battle of the forms case under the CISG); Lincoln Composites, Inc. v. Firetrace USA, LLC (8th Cir. 2016) (defining when an exclusive remedy “fails of its essential purpose” under UCC §2-719, and also discussing how to measure breach of warranty damages for accepted goods under UCC §2-714); and Zaretsky v. William Goldberg Diamond Corp. (clarifying which merchants “deal in goods of the kind” for purposes of UCC §2-403(2)) Professors and students will benefit from: A problem method that forces students to engage in the most productive level of learning during classroom time: applying the law to new facts. In-depth Teacher’s Manual enables instructors to be well-equipped to guide students through the problems. An author who is always happy to interact directly and on short notice with casebook adopters by phone or email regarding any questions on any material in the book. Concise text that explains the law clearly so that students can successfully answer the problems for class. Extensive interviews with various players in the sales system giving the material a real-world relevance that students particularly appreciate. More than 100 multiple-choice assessment questions with detailed explanations to help students measure and clarify their understanding of the material as they go along, consistent with the

requirements of new ABA Standard 314 on the need for formative assessment tools in the law school curriculum.

Global Mobile Satellite Communications Stojce Dimov Ilcev 2005-12-05 Global mobile satellite communications (GMSC) are specific satellite communication systems for maritime, land and aeronautical applications. It enables connections between moving objects such as ships, vehicles and aircrafts, and telecommunications subscribers through the medium of communications satellites, ground earth stations, PTT or other landline telecommunications providers. Mobile satellite communications and technology have been in use for over two decades. Its initial application is aimed at the maritime market for commercial and distress applications. In recent years, new developments and initiatives have resulted in land and aeronautical applications and the introduction of new satellite constellations in non-geostationary orbits such as Little and Big LEO configurations and hybrid satellite constellations as Ellipso Borealis and Concordia system. This book is important for modern shipping, truck, train and aeronautical societies because GMSC in the present millennium provides more effective business and trade, with emphasis on safety and commercial communications. Global Mobile Satellite Communications is written to make bridges between potential readers and current GMSC trends, mobile system concepts and network architecture using a simple mode of style with understandable technical information, characteristics, graphicons, illustrations and mathematics equations. Global Mobile Satellite Communications represents telecommunications technique and technology, which can be useful for all technical staff on vessels at sea and rivers, on all types of land vehicles, on planes, on off shore constructions and for everyone possessing satellite communications handset phones.

Social Costs Today Wolfram Elsner 2012-06-25 This book deals with the current crises from a somewhat different the usual perspectives. It claims that causes and policy implications of these crises cannot be properly assessed by focusing on allocative efficiency or income growth alone; it requires a more general approach, based on social costs. It does not deal with social costs according to the Pigouvian or the Coasian traditions. It draws on the work of Original Institutional Economics (OIE) such as Thorstein Veblen, Karl William Kapp, and Karl Polanyi, on Post-Keynesians such as Hyman Minsky and, in general, on authors who have provided insights beyond the conventional wisdom of economic thought.
